HOW TO MAKE THE MOST OF YOUR CHART

In a quiet moment, sit down with your child and explain how the reward chart works, and agree her final reward from a list of approved options – you can checkout supernanny.co.uk/advice for more help with your reward chart as well as how to use charts for younger and older kids, single issues or sibling strife.

Stick the chart up where everyone can see it, and use blu tack to stick your child's character on the first step. Reward her progress up the chart with plenty of praise and have a small surprise treat ready to mark the halfway point. When she reaches the top, let her know how pleased you are with her and give her the reward promptly: she's earned it!
